**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-25, drawn to an operation that enables a data transmission method in a communication system, the system comprising at least one base station and at least one subscriber station, wherein the at least one subscriber station allocates capacity for connections (455/450 (a mobile station is assigned a communication resource for communication)).

II. Claims 26-55, drawn to an operation that enables a data transmission (455/452.2, (dynamic channel allocation is dependent on a parameter related to desired quality of service)).

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct from each other because of the following reasons: Invention I deals with the operation that enables a data transmission method in a communication system, the system comprising at least one base station and at least one subscriber station, wherein the at least one subscriber station allocates capacity for connections (455/450 (a mobile station is assigned a communication resource for communication)); Invention II deals with the operation that enables a data transmission (455/452.2, (dynamic channel allocation is dependent on a parameter related to desired quality of service)).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different modes or operation, different functions, or different effects, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
